PROFILE SUMMARY

As a fresher Full Stack Developer specializing in the MERN Stack, I excel in building dynamic web applications with React.js, Node.js, and MongoDB. I have developed projects like a music streaming app and a social media platform. I aim to leverage my expertise to contribute to innovative projects and impactful user experiences.

EDUCATION

Sri Krishna Arts and Science College *June 2018 - June 2021*
Bsc.Maths CGPA: 7.8

AVB Matric Hr.Sec School *May 2018*
State Board CGPA: 8.6

TECHNICAL STRENGTHS

Computer Languages	JavaScript
Software & Tools	React.js, Node.js, MongoDB, MySQL, Express.js, Bootstrap, HTML, CSS, Git
Skills	Full Stack Development (MERN) Front-end Development (React.js, HTML, CSS, Bootstrap) Redux, Tailwind CSS Back-end Development (Node.js, Express.js) Database Management (MongoDB)

PROJECTS

Music Streaming App April 25, 2024 - May 25, 2024

· Developed a music streaming application:

- Integrated Spotify API for music streaming, enabling users to search and play songs with play, pause, and like functionalities.

- Implemented a playlist management system, allowing users to create, view, and manage personalized playlists.

- Developed user authentication with login and registration forms using Formik for seamless user experience and form validation.

- Built the front end using React and Redux, ensuring a responsive design and efficient state management across the application.

- Integrated JWT (JSON Web Token) for secure password hashing and authentication, safeguarding user credentials, and ensuring secure access to application features.

Dairy Manager   June 05,2024 - July 05, 2024

· Developed a Dairy Manager application:

- Developed a digital diary application allowing users to create, view, update, and delete diary entries, providing a personal journaling experience.

- Implemented CRUD operations to manage diary entries, ensuring smooth and intuitive user interactions for diary management.

- Designed a user-friendly interface with React for the front end, focusing on ease of navigation and entry management.

- Utilized Node.js and MongoDB for back-end development and data storage, ensuring secure and efficient handling of user data.

- Developed a robust back-end infrastructure using Express.js and Mongoose, ensuring efficient data storage, retrieval, and manipulation for diary entries and user management.
